## How to Use This Guide

This guide is to be used with a set of videos showing how to play Street Smart Roulette System.

The links to the videos are in each chapter in this guide. For example, the link to the first video is in the chapter **Video 1 – How to Make Street Smart Bets!**

# Introduction

How would you like to win \$1,144 an hour playing roulette online?

And, what if you could do it making \$2 bets?

And, what if you could do it automatically?

That's what the Street Smart Roulette Players Kit is all about –

To teach you how to win at roulette using Street Smart Roulette Strategy.

The Players Kit consists of several parts:

**The Quick Start Guide** – If you already know how to play roulette you can start here.

**The Players Manual** – Here the strategy is explained in detail with several Sample Games. It is suggested that you start here.

**Street Smart Roulette Video Guide** – This book is the Video Guide to the Videos. You should read the Players Manual before viewing the videos. The links to the videos are in this book.

**The Street Smart Roulette Bet Tracker**– After reading the Players Manual and watching the videos you should try playing using the video guide.

**How to Turn \$50 Into \$25,000 in Two Days with Street Smart Roulette**– Once you have learned how to use the strategy you may want to use this plan to win \$25,000 or more every week. This is a proven plan that will work for you too!

The links to the videos are in each chapter in this guide. For example, the link to the first video is in the chapter Video 1 – **How to Make Street Smart Bets**

## **Video-1 How to Make Street Smart Bets**

[Link to Video 1](#)

<https://youtu.be/Ei1b5kXiuAo>

### **[Showing Spinning Roulette Wheel]**

This is Video-1 for Street Smart Roulette. You can follow along in the Street Smart Roulette Video Guide. I suggest that you print the video guide so that you can refer to it while you view the videos.

I'm Russell Hunter. I am going to show you how to use Street Smart Roulette to make a lot of money playing roulette.

### **[Show Table Layout]**

Street Smart Roulette is based on the fact that numbers often repeat in roulette. In every version of roulette, including land-based roulette wheels and electronic and online versions of the game, a phenomenon occurs –

In a short run of spins some numbers will repeat while others won't show at all. Street Smart Roulette sets up webs of bets designed to catch numbers which repeat as well as numbers which haven't hit yet.

With Street Smart Roulette you will only make Street Bets. Each Street Bet covers three numbers.

The Street Smart Roulette strategy consists of placing one, two or three street bets according to a betting system we use.

In this video I am just going to show you how to make the Street Bets used in this system.

We'll have the dealer spin the wheel so we can get started with the system. The dealer spins the wheel and the roulette ball lands on number 5.

In this system we aren't concerned with which color the ball landed on, just the number.

We have to observe just one spin to start this system. We just observed the number 5 showed. To start we place a \$1 on the Street or Line of numbers covering the number 5. We place the bet at the edge of the layout. In most casinos we place the bets at the end of the row next to the outside bets. In some online casinos you will place the Street Bet on the opposite end of the row (show where bet is placed).

Now, we've got three numbers covered with one bet. We are covering the numbers 4, 5 and 6. If any of these numbers show on the next spin we will win the bet.

Each Street Bet pays off at 11 to 1. With a \$1 Street Bet if it wins we will win \$11.

Let's have the dealer spin the wheel again. The number 19 shows.

We lose the first Street Bet. Let's replace that bet with another \$1 bet and add another \$1 wager on the street for number 19 covering the numbers 19, 20, 21.

We now have two Street Bets up covering the numbers 4,5,6 and 19,20-21. If any of these numbers show on the next spin we will have a win.

Let's get another wheel spin. The dealer spins the wheel and the number is 36. We lose both of our Street Bets.

Let's add one more Street Bet.

We'll replace the two Street Bets that lost with new bets of \$1 on each street.

The first Bet is on number 5 and the second bet was on number 19. Even though each of these bets cover three numbers we refer to the bets by the original numbers of 5 and 19 in the Street Smart Roulette manual.

Now, lets add another Street Bet on the last number of 36.

We now have three Street Bets up as follows:

Bet on	Numbers Covered
5	4 5 6
19	19 20 21
36	34 35 36

If we Bet \$1 on each Street and one of our number hit, we would have a win of \$9 computed as follows:

Street Bet Win 11 to 1 ( $11 \times \$1 =$ )	\$11
Loss of one bet	-1
Lose of one bet	-1
Net for Round	\$9

Street Smart Roulette consists of observing a spin then making a street bet to cover the number which showed. However, one bet doesn't just follow another like we have seen in this video. We use a pattern of betting where three numbers, six number, then nine numbers are covered until we have a win.

I'll show you how we use this pattern of Street Bets in the next video.

## Video-2 Setting Up Patterns of Street Bets

[Link to Video 2](#)

[https://youtu.be/IZ-Bi\\_fhuKo](https://youtu.be/IZ-Bi_fhuKo)

This is Video-2 for Street Smart Roulette. You can follow along in the Street Smart Video Guide.

In this video you are going to learn how to follow the pattern used to place the Street Bets used by Street Smart Roulette.

With Street Smart Roulette we will make from one to 14 rounds of Street Bets. Testing has shown that this is adequate to give the system a 99.37 win rate! This makes the system very profitable.

Let's assume that we had the same three numbers show as did in Video-1. The numbers are 5, 19 and 36.

With Street Smart Betting we will continue to make Street Bets on the selected numbers until we have a win.

For example, since number 5 was the first number to show, we will set up a Street Bet on number 5 and continue to make this bet for up to fourteen rounds of play. We will only change this bet if we have a win.

So let's assume we make a Street bet covering number 5 and number 19 shows. We now replace the lost bet on number 5 and add a new bet on number 19. This gives up two street bets. We will continue with these same bets for up to four rounds of play as follows:

Round	Bet 1	Bet 2	Bet 3	Number
1	5			19
2	5	19		16
3	5	19		3
4	5	19		28

We will assume that number 16 shows on round 2. For round 3 we replace our bets on numbers 5 and 19.

On round 3 number 3 shows and we lose our bets. For round 4 we replace our bets on numbers 5 and 19.

On round 4 number 28 shows and we lose both bets. This number has significance for us as we will add another bet in the next round on number 28.

From here on out we continue with bets on the same three numbers until we either have a win or lose fourteen rounds of play.

Don't worry. Here's where our 99.37% win rate comes into play. Based on long-term play we know that one of these numbers will win 99.37% of the time.

We will continue to repeat our three street bets on the same numbers from round 5 until we have a win. Once we have a win we start over with one Street Bet on the last number to show.

This table below shows the possible number of Street Bets which will be made.

Round	Bet 1	Bet 2	Bet 3	Number
1	5			19
2	5	19		16
3	5	19		3
4	5	19		28
5	5	19	28	
6	5	19	28	
7	5	19	28	
8	5	19	28	
9	5	19	28	
10	5	19	28	
11	5	19	28	
12	5	19	28	
13	5	19	28	
14	5	19	28	

If it is rare that you will make more than five or six rounds of bets before having a win.

Let's assume that number 4 shows on round 6. This will give us a win on our very first street bet on number 5, which covers the number 4, 5 and 6.

With this win we start over. Since number 4 showed on the next round we will make one Street Bet covering number 4.

At this point we can be 99.37% certain that one of your bets will win in from one to fourteen rounds. However, this still doesn't make this a winning system. In order to turn this into a profitable system we have to adjust the amounts we bet on each round of play!

## **Video-3 Matching Bet Size of the Level of Betting**

[Link to Video-3](#)

<https://youtu.be/0zPjaTMuFn4>

This is Video-3 for Street Smart Roulette. You can follow along in the Street Smart Video Guide.

In Video-1 we learned how to make Street Bets, the bets used in this system. We learned that we make from one to three Street Bets with Street Smart Roulette.

In Video-2 I showed you how Street Smart Bets are set up in rounds of play.

In round 1 we make one Street Bet.

In rounds 2 through 4 we make two Street Bets.

In rounds 5 through 14 we make three Street Bets.

Where we make the bets is determined by where the roulette ball lands.

The system consists of following this pattern of betting until one of our numbers wins.

Once we have a win we can either stop betting, with a winning game completed, or if we continue to play, we start over with a new set of bets.

We can use this system with confidence as it has a documented 99.37% win rate. In the rare event that you complete all fourteen rounds of play without a win you will lose a game. Relax. This is a rare event.

While the system of setting up from one to fourteen rounds of play is a sound one to hit a winning number it is not a winning system in and of itself. In order to win we have to adjust the size of the bets as we play.

We use the Street Smart Roulette Betting Series to determine the size of our bets. This Betting Series is shown on page 107 of the manual.

### Street Smart Betting Series –\$1 Bets

Level	1	2	3	4	5	6	7	8	9	10	11	12	13	14
<b>Betting Unit</b>	1	1	1	1	2	3	4	5	7	10	14	20	26	36
Bet 1 (10:1)	1	1	1	1	2	3	4	5	7	10	14	20	26	36
Bet 2 (10:1)		1	1	1	2	3	4	5	7	10	14	20	26	36
Bet 3 (10:1)					2	3	4	5	7	10	14	20	26	36
<b>Total Bet</b>	1	2	2	2	6	9	12	15	21	30	38	60	78	109
<b>Net Win for Round</b>	11	10	10	10	18	27	36	45	63	90	126	180	234	324
Prior Losses	0	1	3	5	7	13	22	34	49	70	100	138	198	276
<b>Net Value of Win After Deducting Prior Losses</b>	11	9	7	5	11	14	14	11	14	20	26	42	36	48

Each level of betting in the table corresponds to a round of betting using this system.

For Round 1 we bet on 1 Street Bet. We use one betting unit. This can be a 25-cent, \$1, \$2 or \$5 bet. Your base bet is your unit bet. In this demonstration we will use \$1 bets.

If we lose Round 1 we move up to Round 2. Here we bet \$1 each on two Street Bets. If we lose this round we move up to Round 3.

For Round 3 we still make two Street Bets of \$1 each. If we lose this round we move up to Round 4 betting.

For Round 4 we continue to make two \$1 Street Bets. The value of the net win is shown for each round.

Let's back up to Round 1. If we win our first bet we win 11 units or \$11 for \$1 betting.

If we win Round 2 we win 10 units for the round. To determine our net win for this betting series we have to deduct the loss of bets in Round 1. This gives us a net win of 9 units for Round 2.

This Table continues to show the Betting Unit, number of bets and win and loss information. Let's jump up to Round 7 betting.

For Round 7 we bet 4 units on each Street Bet. We bet on three Street Bets for a total wager of 12 units. If we win this round we will pick up a win of 36 units. To compute our net win we have to deduct prior losses of 22 units. This gives us a net win of 14 units at this level.

If you look at just the Betting Unit row in the table you will see that we range from one-unit to 36-unit bets. In order to be able to make these bets you have to use an adequate bankroll. The bankroll needed is 400 units.

So, for \$1 Valued Bets we need a bankroll of \$400. If we were making 25-cent bets we could use a bankroll of \$100.

A Summary of bankroll requirements is shown on page 157 of the playing manual.

At this point we have covered how to use the complete system. In the final video we'll go over recording your bets in real play.

## Video-4 Keeping Track of Your Bets

[Link to Video-4](#)

<https://youtu.be/LHiEnn-P9Iq>

This is Video-4 of Street Smart Roulette. Before you view this video you should have watched the first three videos.

You should understand how to make Street Bets. (Video-1).

You should have a grasp of how we set up rounds of bet (Video-2).

You should know how we use a Betting Series to determine the amounts wagered on each round of play (Video-3).

Now we'll get down to using this system to play and win.

We'll review the first part of Sample Game 1 shown on page 109 of the manual

The first step is to observe a spin. We observe the spin and the ball lands on numb 31.

This sets up our first bet on the Street covering number 31. We consult the betting series and see that for Round 1 we will make one 1-unit Street Bet.

### Street Smart Betting Series –\$1 Bets

Level	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Betting Unit	1	1	1	1	2	3	4	5	7	10	14	20	26	36
Bet 1 (10:1)	1	1	1	1	2	3	4	5	7	10	14	20	26	36
Bet 2 (10:1)		1	1	1	2	3	4	5	7	10	14	20	26	36
Bet 3 (10:1)					2	3	4	5	7	10	14	20	26	36
<b>Total Bet</b>	1	2	2	2	6	9	12	15	21	30	38	60	78	109
<b>Net Win for Round</b>	11	10	10	10	18	27	36	45	63	90	126	180	234	324
Prior Losses	0	1	3	5	7	13	22	34	49	70	100	138	198	276
<b>Net Value of Win After Deducting</b>	11	9	7	5	11	14	14	11	14	20	26	42	36	48

<b>Prior Losses</b>														
---------------------	--	--	--	--	--	--	--	--	--	--	--	--	--	--

We bet \$1 on the Street 31-32-33. The dealer spins the wheel and the ball lands on number 2. We lose the round.

We record the number we bet on (31), the new number (2) and a Loss for the round.

## Sample Game

Round	1	2	3	4	5
Number	2	10	25	3	29
Level	1	2	3	4	1
Amount	1	1	1	1	1
Bet-1	31	31	31	31	3
Bet-2		2	2	2	
Bet-3					
W/L	L	L	L	W	L
Balance				+5	

For Round 2 we will set up two Street bets in the amount of \$1 each. We restore the lost street bet on number 31 and set up a new Street Bet on the last number of 2 (1-2-3).

The dealer spins the wheel and number 10 shows. We lose both of our bets. We record our bets and the loss and move to Round 3 betting. Please notice for Round 3 we continue to make same two Street Bets of \$1 each. The last number showing of 10 does not affect our betting. We place our bets and the dealer spins the wheel. The number 25 shows. We lose both of our bets. We update the tracking form showing a loss for Round 3.

For Round 4 we continue with \$1 bets. We make bets on the same two Street Bets of 31 (31-32-33) and 2 (1,2,3). The dealer spins the wheel and the number 3 shows. This gives us a win on our first Street Bet. The dealer pays us \$11 on the winning street. We win of \$5 after deducting prior losses.

For Round 5 we start the process over with a Level-1 Street bet of \$1 on the last number to show of 3.

I am going to stop here in this video. You should continue to follow this game in the manual on page 110.. You will see that the tracking form allows you to keep track of each level of play.

The Automatic Bet Tracker has blank forms you can use for recording your own games.

At this point I suggest you review the Chapter in the manual starting on page 112 which shows you what to do if a zero shows.

You can review this system in the Quick Start Guide. For practice you should play at [Bovada Casino](#)

Street Smart Roulette is a highly effective way of beating roulette. It has been extensively tested by real players just like you!

After mastering this system you should play some same games at Bovada in free practice mode. You should use the Automatic Bet Tracker to record your play. This will not only help you learn to play correctly but will give you practice in using the Automatic Bet Tracker!

We have taught this system to many players and they are highly successful with it.

If you have any questions we offer full support by email. Just contact us at [orders@silverthornepublications.com](mailto:orders@silverthornepublications.com)

Russell Hunter wishing you high profits and great success with Street Smart Roulette!
